

- The course content will not be based on one book only. Besides the books listed on the course webpage original research article will be used. The book chapters needed will be provided in the Blackboard System. Note, that I will use so-called "WebFolders" from the BB9 system, you should be able to access all data via the WebDav resource <https://elearn.sdu.dk/bbcswebdav/courses/15015401-f-E14N/Material> (authentication via blackboard user / password). See for example this link for how to access a WebDav resource using Ubuntu 12.04.
- Topics of week 36: Introduction to the course, introduction to Polya enumeration. Starting with "Generative Chemistries".
- The project work for DM832 will consists of mandatory assignments. The first mandatory assignment will be published end end of week 37 or beginning of week 38.
